*Staph. saproscius* is a species of *Staphylinidae* found in the United States. It is a small, dark, elongated beetle with a prominent head and antennae. The body is covered in a fine, granular texture. The legs are short and stout. The color is a dark brown or black. It is found in a variety of habitats, including forests, fields, and urban areas. It is a common pest of stored grain and other foodstuffs.
