her STYLE

THE NEW TRADITION

Trends in fashion unify women and men around the world, yet they still allow people the ability to portray their own individual style at the same time. A period of time portrayed in a picture can be identified immediately just as the style of clothes the people are wearing, and this sums up just how powerful and all-encompassing fashion is. Fashion can change from one season to the next, but what never changes is the role it has over society, and the role it plays in the modern world.

In the 21st century the style range of the fashion industry dominates the world more than they ever did, and control not only the way people dress but the trends in home ware design, makeup fashion and people's overall attitudes. In the 21st century power did not only mean State and banks, it summed up the whole attitude of a generation, and this is even more prominent today.
